Health Services Transition Information  
(For CCSD Transition Personnel )

Significant health issues are often present in students eligible for post-secondary programs. It is important to collaborate with the site school nurse to obtain information about student health status prior to making decision related to program placement. Updated health information is also needed from parent/guardians (CCF 768).

- Send CCF 768 with transition application for parent/guardian to complete
- Completed CCF 768 should be forwarded to the school nurse along with a copy of this form
- Collaborate with the school nurse regarding student health status and possible safety concerns related to offsite program placement
- A CCF 503 provides parent/guardian authorization to release necessary health information to any outside agency

Information to be completed by school nurse:

School Nurse:_________________________  Date:____________________

____ Student has no health/safety related concerns

____ Student has health/safety concerns that require further team review. Describe:_________________________

____________________________________________________________________________________

____________________________________________________________________________________

Completed form should be returned and filed with Transition application for the post-secondary program.
